AMENDMENTS TO THE SPECIFICATION:

Please replace paragraph [0024] with the following amended paragraph:

[0024] Referring to FIG. 6, there is shown a block diagram of an exemplary data processing system 600 according to one embodiment of the invention. The data processing system is suitable for implementing EPS graphics technology. The data processing system 600 includes an input device 610, a central processing unit or CPU 620, memory 630, and a display 640. The input device 610 may be a keyboard, mouse, trackball, or similar device. The CPU 620 may include dedicated coprocessors and memory devices. The memory 630 may include RAM, ROM, databases, or disk devices (e.g., a computer program product). And, the display 640 may include a computer screen or terminal device. The data processing system 600 has stored therein data representing sequences of instructions (e.g., code) which when executed cause the method described herein to be performed. Of course, the data processing system 600 may contain additional software and hardware a description of which is not necessary for understanding the invention.
